

T18000 3P HEPA Dust Extractor

Creating Clean Air for Construction, Abatement and Restoration

The most powerful HEPA Dust Extractor on the market today. Greatly expanded pre-filter surface area acts as a built-in pre-separator providing superior cyclonic separation for long, uninterrupted service periods. The T18000 produces plenty of airflow to handle 60 inch grinders or two three-head grinders. T18000 is the only extractor that can keep up with shavers and shot blasters. Clean air exhaust is guaranteed through four individually tested and certified HEPA filters. The intake port connects to a Y-connector where one or two 3" hoses can be connected.

When used with one hose, up to 100-feet in length can be used. The out-port allows venting of the exhaust air away from the work area or outside of the building via a hose connection. Jet Pulse efficiently cleans pre-filter without exposing operator to dust. The unique 72 foot Longopac® allows fast, drop-down, dust-free disposal into approximately 25 individually sealed bags. Comes with a 3-inch, 33-foot hose, and a single 4-inch to double 3-inch Y connector.

When used with two 3-head grinders (up to 32" wide), and to achieve best results, a pre-separator should be connected between each grinder and the T18000

T18000 Specifications

CFM:	710
HP:	18
Amp:	28
Volts:	480
Water Lift:	140
Shipping Weight:	905
Product Code:	200700508B

Coated Pre-Filter Socks:
twenty-five multi-layered

Onboard Distribution Box:
for connecting grinder to vacuum

"Y" connector:
for a single or dual hose application

Filter information

4 HEPA Filters 108 (ft²), 99.99% at 0.3 microns
