

## T4000 & T7500 Gas HEPA Dust Extractor's

### Creating Clean Air for Construction, Abatement and Restoration

With the continuing development of dry diamond tooling and equipment for cutting, coring, and grinding, collection of harmful dust is more and more important. Electrical power supply is hard to come by on many jobs so propane units are needed. Pullman Ermator makes the best direct drive with magnetic clutch system that puts all the power to the turbine. Dry cutting and grinding saves expensive disposal costs of wet slurry and water. It is also more productive and leaves job sites cleaner.

- Drop down Longopac® disposal system
- Certified HEPA filtration to 99.99% @ 0.3 microns
- Coated pre-filter socks
- JetPulse filter cleaning
- Cam lock hose connection
- Direct drive magnetic clutch

#### Safety Features:

- Low oil pressure sensor and High efficiency oil cooler
- Muffler rated at 10,000 hrs. with catalytic converter for low emissions
- LEHR Carburetor for low fuel consumption and low emissions
- Housing cover to incase and protect the motor
- EPA (Environmental Protection Agency) certified motor
- CARB (California Air Resources Board) certified motor with O2 Sensor
- **11HP Honda motor delivers 285 CFM and 115" of water lift, that makes this unit the strongest in its class**

#### T4000 Gas Specifications

Weight: 225 lbs	Motor: Honda
CFM: 285	HP: 11
Water Lift: 125	Product Code: 2010006710

Easy battery access

Easy opening for maintenance

Control board key start and hour meter

#### T7500 Gas Specifications

Weight: 530 lbs	Motor: Honda
CFM: 410	HP: 18
Water Lift: 115	Product Code: 200600404R
